

**ImmoAds**

A smarter way to write apartment ads.

# ImmoAds

An AI-Powered Apartment Ad Generator for Berlin

Project 2 — AI Content Creator | Module 2

Team

**Vittal · Akansha · Andreas**

## OVERVIEW & MOTIVATION

# Frustrating listing ads with missing key info

**1**

### The problem

Apartment owners write generic listings, or lean on ChatGPT and get flat, forgettable “AI-slop” copy that doesn't sell the neighborhood.

**2**

### The idea

ImmoAds turns raw listing details into publish-ready, on-brand ad copy — enriched with real local context.

**3**

### The edge

Two knowledge bases (brand voice + Berlin market context) plus PLZ-based schools/transport/Kita lookups make every ad specific, not generic.

## PROJECT STRUCTURE

# Quality, Time, Cost — and our top risk

### Quality

Ads must be accurate, brand-consistent, and clearly non-generic — regardless of retrieval method. Integration of free APIs to pull data from public sources.

### Time

MVP (ingestion, both KBs, PLZ lookup, generation, UI, PDF export - optional) done within the 2-day window.

### Cost

Standard low cost LLM API and free/open location datasets only — no paid data subscriptions.

### Stakeholders

**Home Owners**

**Real Estate Agents**

**Tenants & SubLeaser**

### Top Risk

**Generated ad content reads as generic / AI-like**

Probability: M | Impact: H | Strategy: Mitigation

Action: 2+ prompt style variants, required human-in-the-loop review before export.

## KNOWLEDGE BASE ARCHITECTURE

# Two knowledge bases, one clear job split

### PRIMARY

#### Brand & product knowledge

- Brand & tone guidelines
- Past successful ad examples
- Owner listing details

*knowledge\_base/primary/ → [Ad.md](#), brand\_guidelines.md*

### SECONDARY

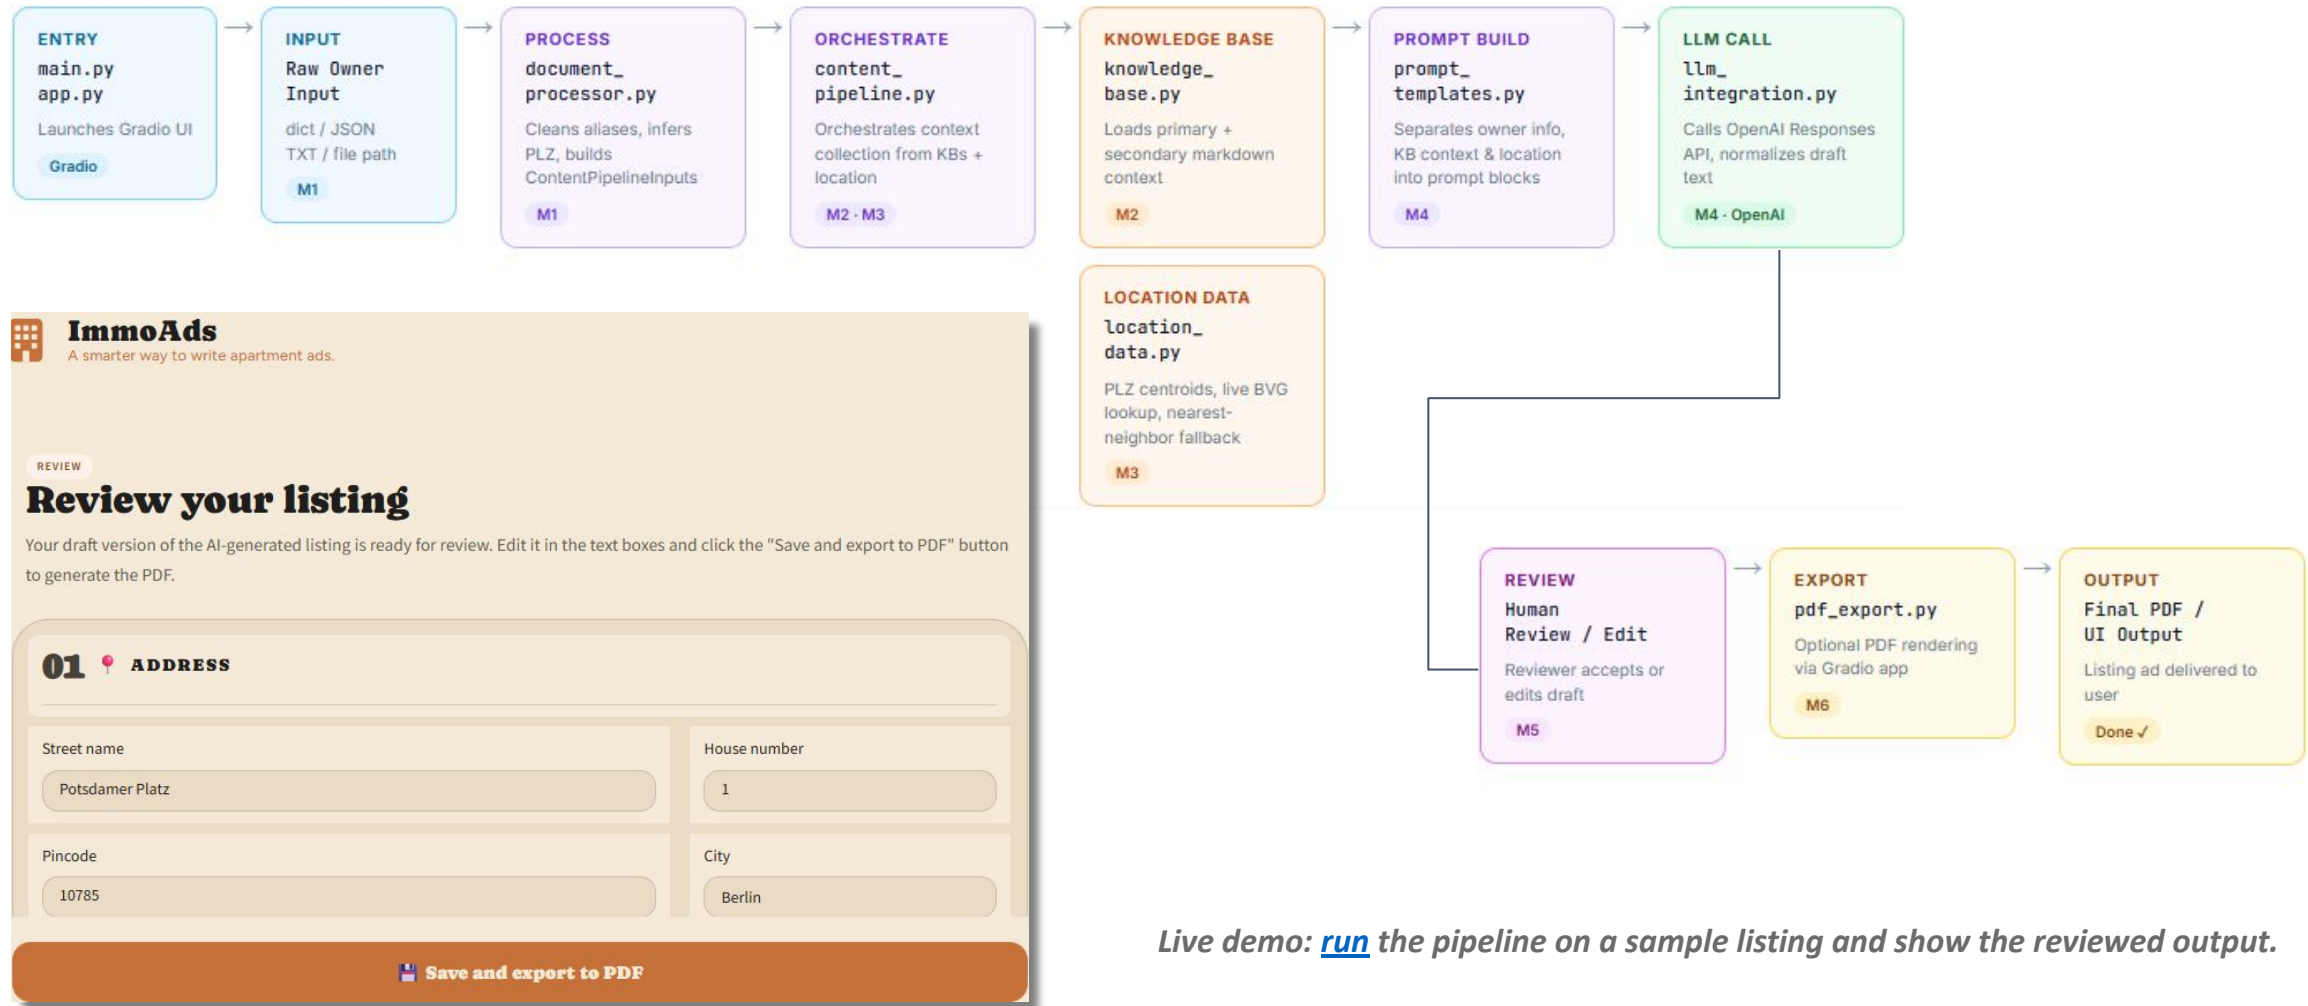

#### Market & location context

- Berlin market context
- PLZ-based schools / transport / Kita lookup
- Deterministic facts, not free-text retrieval

*knowledge\_base/secondary/ → berlin\_districts.md + kita.md*

## PIPELINE DEMONSTRATION

# From raw listing input to a reviewed, publish-ready ad

Live demo: [run](#) the pipeline on a sample listing and show the reviewed output.

## RAG DECISION

# Why we chose non-RAG context injection

### Corpus size

A handful of markdown files, largely static across the 2-day build — everything fits directly in the prompt.

### Data type

Schools/transport/Kita facts are structured PLZ lookups, not semantic retrieval from long prose.

### Quality objective

Accurate, brand-consistent, non-generic ads — achievable without retrieval infrastructure.

### Time & complexity

2-day window and free-tier or low cost tools favor a simple, testable pipeline over embeddings + indexing.

## UNIQUENESS DEMONSTRATION

# How we avoid “AI-slop”

### Generic ChatGPT - Warm Voice

Apartment for Rent – Potsdamer Platz 1, 10785 Berlin Welcome to this beautifully renovated 84.3 m² old-building apartment offering timeless charm and modern comfort. Featuring 3 rooms, 1 spacious bedroom, 1 bathroom, elegant parquet flooring, a fitted kitchen, balcony, cellar and elevator, this inviting home is ideal for professionals or couples seeking city living in one of Berlin's most desirable locations. is PLZ.

## CHALLENGES & LEARNINGS & FUTURE IMPROVEMENTS

# What we ran into — and how we handled it

### CHALLENGES

- *UI Challenge - limitation of Gradio*
- *Prompt fine tuning*
- *Location fituning and address verification*
- *Keeping within the scope*
- *Drop the 2d floor plan analysis feature but included the pdf export of pictures.*
- *PDF creation via python libraries*

### FUTURE IMPROVEMENTS

- *User verification.*
- *Integration with property listing platforms*
- *Sharing on social platforms and other website.*
- *Rent range barometer.*
- *Include other amenities.*
- *User feedback*
- *Creating logging function*
- *Translations / Other languages*

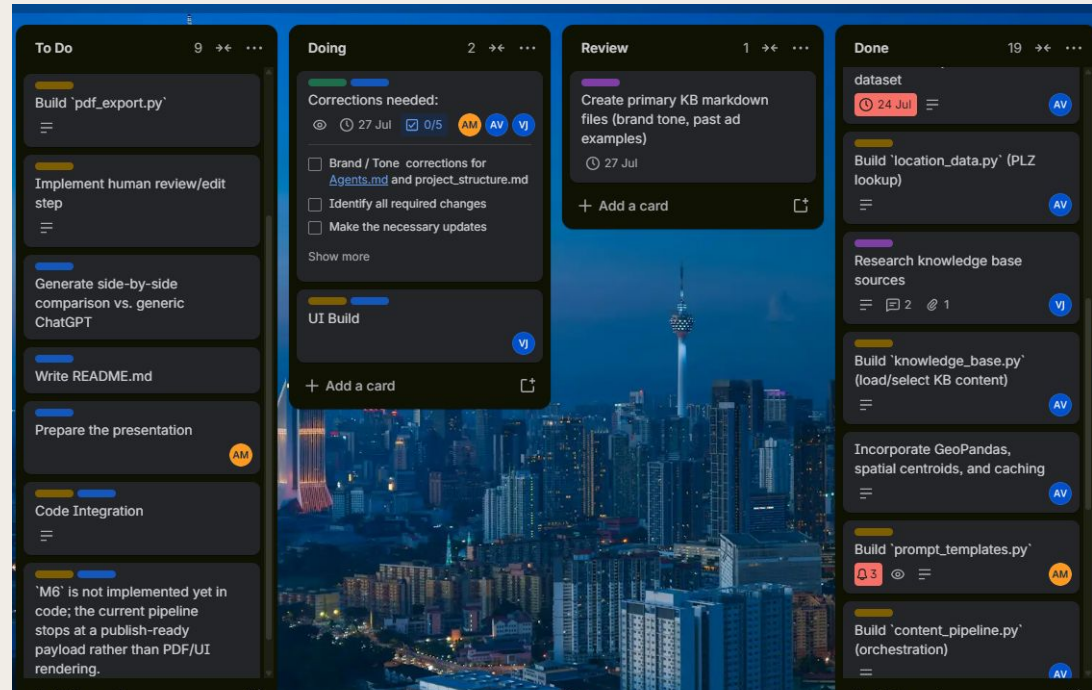

## KANBAN BOARD

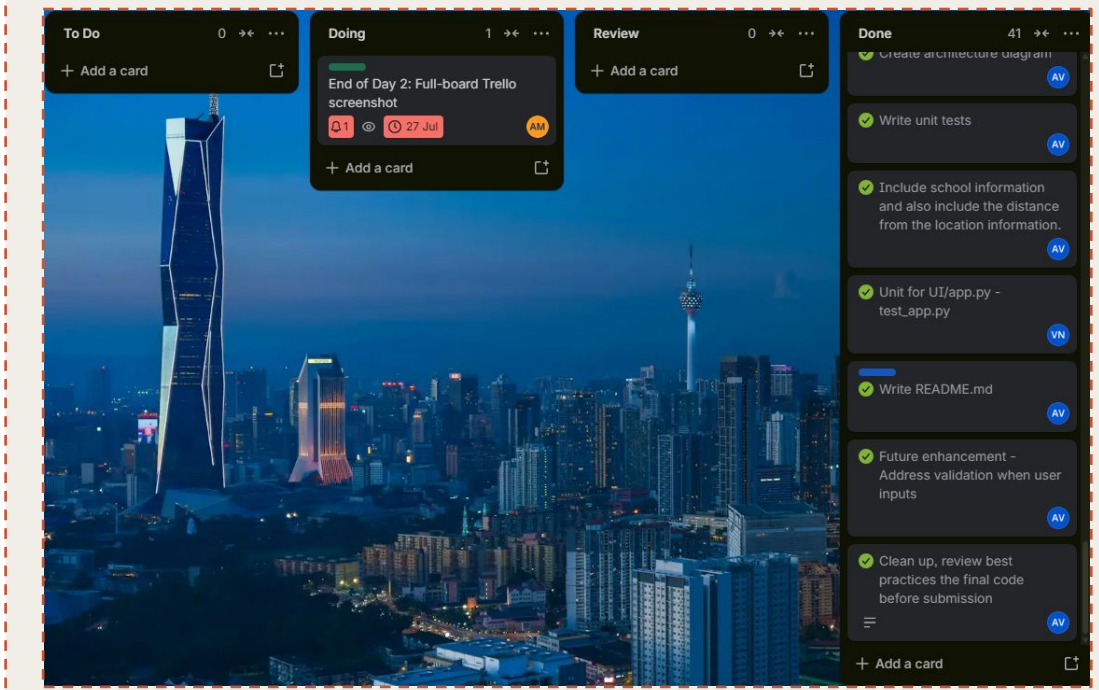

Day 1 → Day 2: Backlog → Ready → In Progress

(WIP 2) → Review → Done

### Day 1

### Day 2

*Thank you*
